- **Tools/Plateforms**: VS Code, GIT, Atom, Linux, Web, Windows
- **Soft Skills**: Leadership, Event Management, Writing, Time Management

EXPERIENCE

- **Zust Web OPC Pvt. Ltd.** — Remote
  Frontend Developer (Internship) — *May 2022 - July 2022*
  - Developing new web applications and maintaining existing web applications using HTML, CSS, and JavaScript and React.js.
  - Working with the design team to ensure that the user interface is aesthetically pleasing.
  - From using APIs to integrate different services into the website, to creating dynamic user interfaces with JavaScript, I was able to learn a wide range of skills.
  - Proficiency working on RESTFUL APIs.
  - Collaborating with other engineers to ensure the application meets all user requirements.

PROJECTS

- **iNoteBook Web App**: VISIT
  - It is the notebook on the cloud, that is it can be used to store any notes or important points on the cloud.
  - It is built using express framework, EJS and it uses MongoDB Atlas as its database.
  - Offers CRUD operations that means where you can create, edit, upload, delete your notes/information privately and securely without any disturbance.
  - Login and Signup functionality provides security to your notes. Only authorize user can access notes.

- **Weather App**: VISIT
  - A React Web App that utilizes the OpenWeatherMap API to return current and 5 day forecasted weather for a given location.
  - A weather forecast site in which user have to enter the city name and it will display the weather conditions of a city.
  - Tech Stack: HTML, CSS, JavaScript, React, Bootstrap, OpenWeatherMap API.

- **News-Portal**: VISIT
  - News-Portal is a modern news app built on React which uses NewsAPI to fetch top news headlines from the API
  - Designed the look of the News App and implemented features like Pagination.
  - We would be using a News API to render news in our news Application. We would be using the Top headlines Endpoint for our application.
  - It is built on React framework and EJS and NEWSAPI.

- **Car-Rental Management system**: VISIT
  - A car rental management system is an autonomous system that will preserve the records of all the cars available, cars rented, etc. The user can rent a car based on its efficiency, performance, effort, or cost.
  - Arrays, Data Structure and OOPs concept are used to build this system.
  - Tech Stack: C++ and OOPs

CERTIFICATION

- **Cisco Educational Academy on JavaScript Essentials, July 2022**:
  - Understands the fundamentals of JavaScript and the way they are used in web development.
  - Learned the essential concepts of programming, including variables, data structures, algorithms, control flow, functions, and exceptions.

VOLUNTEER EXPERIENCE
